agr bhout saari files hai jo abhi add ni hui hai sublime text mai se folder mai hai .. or hame saari files add ni karni then sublime text main ek file banao .gitignore ke name se and usmai bo saare files name rakhdo jisko ignore karna hai

check git status

git add .

git commit -m "tessera commit"

note -- agar tmher saare commit check karna hai kisne kiya kb kiya kya changes hue then run

git log

or

git log -- oneline

17:50

```
C:\Users\Nitish\Desktop\demo\gitignore (demo) - Sublime Text (UNREGISTERED)
MINGW64/c:/Users/Nitish/Desktop/demo

commit 441f2a144d1c9f44e7d8a74ed8b3ff4acbc16989
Author: nitishksingh24 <nitishksingh24@gmail.com>
Date: Mon Feb 10 10:57:48 2020 +0530

Faltu ka commit

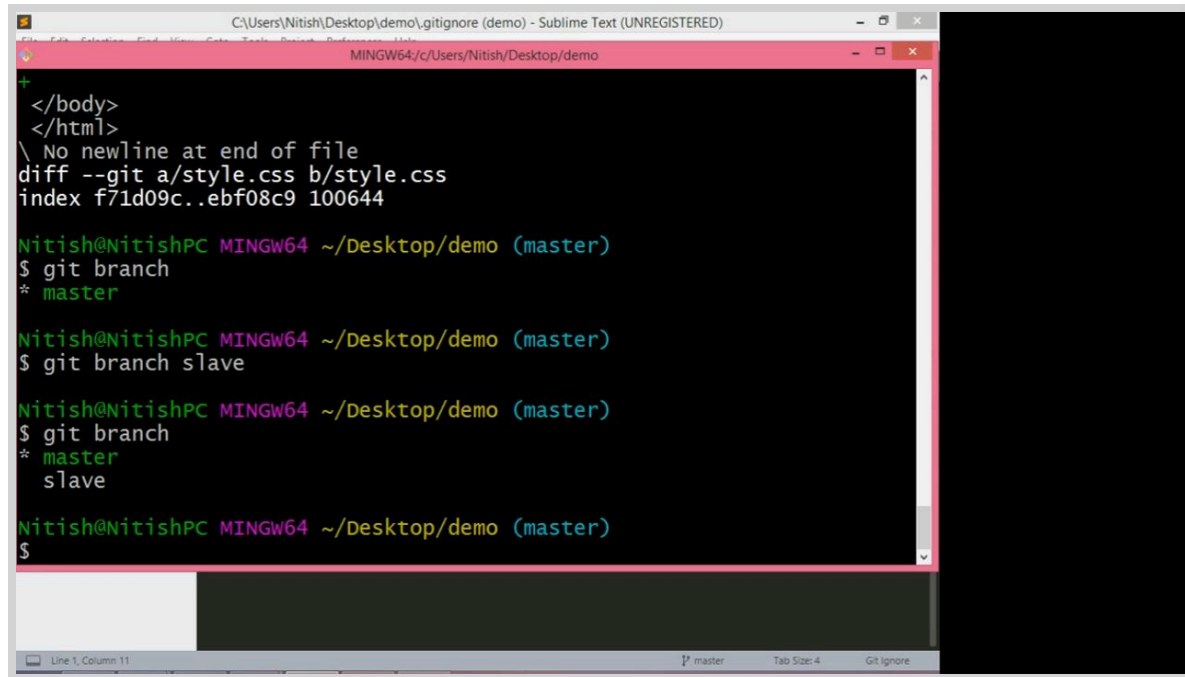

commit 4a4345ecbd88bad578b39bbe81b9309b07e3d0b7
Author: nitishksingh24 <nitishksingh24@gmail.com>
Date: Mon Feb 10 10:56:17 2020 +0530

First commit

Nitish@NitishPC MINGW64 ~/Desktop/demo (master)

so we can divide it into branches and then after we can combine at any instances so u can run m

git branch

if u want to create new branch then u can create by

```
git branch slave
```

now again u run git branch

it will show that how many branches are there and currently in which branch u are working

so

if u want to move to another branch u can run

```
git checkout slave
```

now we are in slave branch the best part is u can check it by changing html file in sublime text

it will show it by running command

```
git status
```

,Now game starts

main mai change kiya bo slave ko ni dikhega

jo slave mai change kiya bo master ko ni dikhega

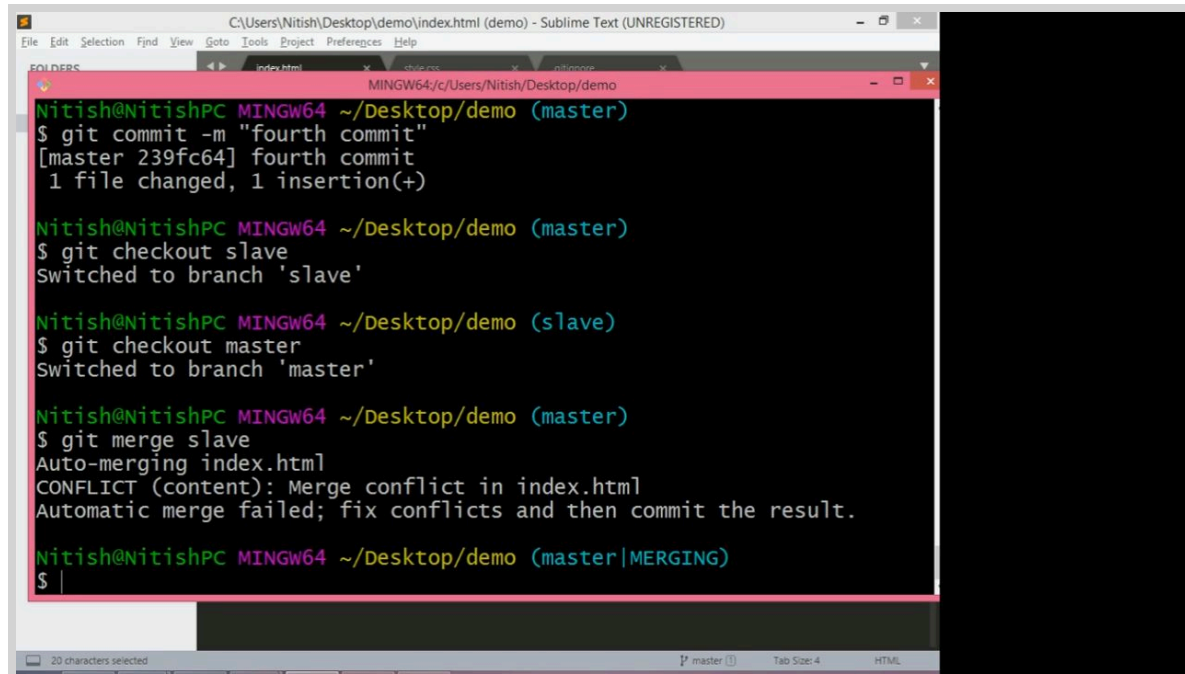

now task is to collect data from all branch and put it into main class

jo first u should be in main

so there is conflict same line mai supoose 2 different line code

likha hai so chages

so programmer will decide konsa code rkhna hai then remove unnecessary code

after that

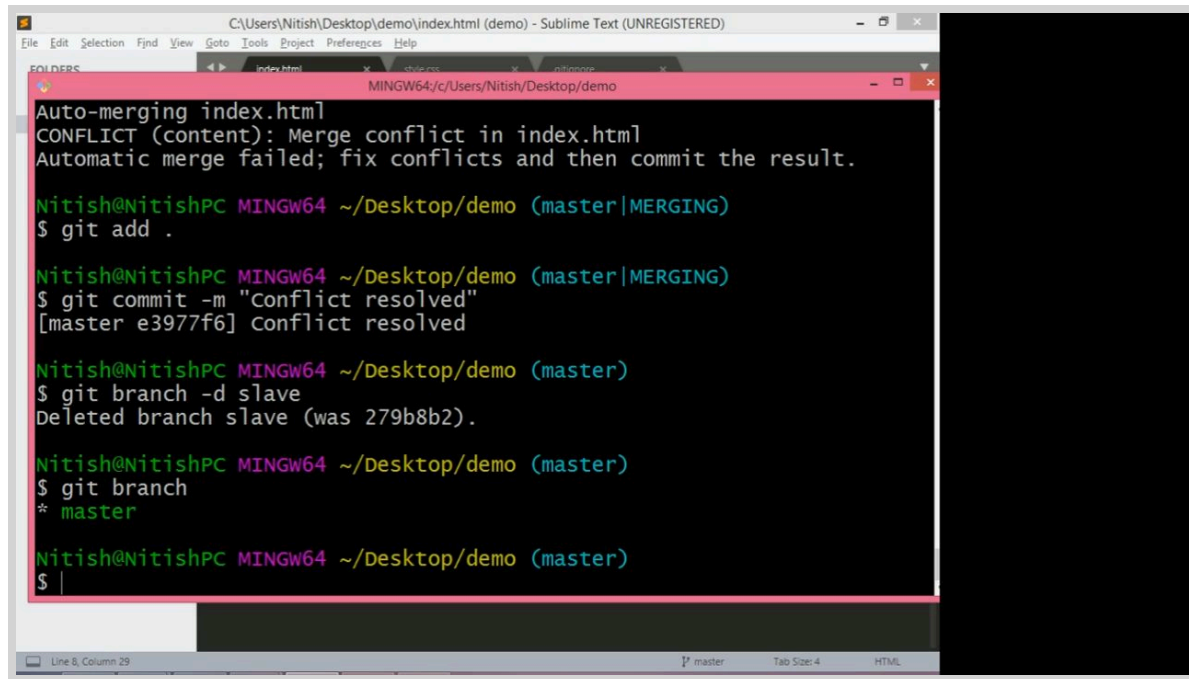

git add .

git commit -m " conflict resolved"

now after merging u have to delete that branch

git branch -d slave

[34:30](#)

so github is a webiste jaha central repo (git project) ko rakh sakte ho so that teams can collaborate

so u can chnage it to github by using
git push origin main

suppose kisi or developer ne clone kiya usne kuch change kiya to bo git pull karega or usko changes dikhne lagega
isiii trah company mai kam chalta hai
